## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-4, 11, 13-16, 18, 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reed (US 5,178,563) in view of Janssen et al (US 6099324).

Reed discloses a conductor device (28), a first plastic component (38), a second molded plastic component (36) are molded (col. 5, lines 4-6), wherein the conductor device is bendable about 90 degrees (Fig 3) such that the first plastic component engage the second plastic component by a snap-in locking device (latch 54)(Fig 12) to form a single integral contacting component (Fig 13)

The teaching as discussed above does not disclose a bending collar.

Janssen et al disclose a bending collar being formed in a second component (44)(Fig 6) for supporting a conductor device (34). It would have been obvious to one of ordinary skill in the art at the time the invention was made to include the bending collar with the contact assembly of Reed for the purpose of supporting the conductor device.

***Response to Arguments***
